Ready to build something BIG?

Join us for an exciting, hands-on summer camp where you'll explore how giant ships are built and discover careers in maritime and advanced manufacturing!

Learn metal fabrication:

- Welding
- Sheet metal
- Laser technology
- Machining

Gain real-world skills:

- Blueprint reading
- Precision measurement
- Workplace safety

Complete hands-on projects:

- Design & 3D print your own object
- Build & test a working model submarine

Camp will be held on Craven Community College's
Havelock Campus at 305 Cunningham Blvd

Sponsored by SparkForce

Space is limited to 16
campers. Register online
to reserve your spot!
